

Mines and Mining Stocks

UNCLE SAM HAS FINE ORE BODY

Recent Deep Development Assures Big Reserves of Splendid Shipping Rock.

At the offices of the Uncle Sam Consolidated yesterday it was learned that the recently encountered ore body in new ground was improving with every shaft work and that it is now considered certain that a great shoot of fine shipping rock is at the disposal of the miners for extraction and shipment to market. The ore body cut on the 100 level from the mine workings appeared to be the strongest in the bottom and sinking in it was decided upon. The new mine is now down thirty-five feet all in ore of a grade that is understood to carry about 50 per cent lead, as many ounces in silver and 10 to 15 per cent gold. These figures are not official, but they closely approximate the assays which are being obtained in the regular sampling of this body of ore as it progresses.

While Manager John Dorn was unwilling to declare his intention with respect to the ore body, it is the general impression that, as soon as it is possible to secure a favorable contract for the output of the mine, regular shipments of ore will be resumed.

By those who ought to know, it is declared that the Uncle Sam mine is in better trim today than it has been in a long time, while its future is becoming more and more certain with every shift of work performed.

There was a sharp advance in the price of the company's shares on the mining exchange yesterday morning.

HYDRAULIC GIANT PLANT SHIPPED TO GOLD NUGGET

A complete hydraulic gold-washing outfit, comprising the necessary pipe line, hose, giant nozzles and other paraphernalia, was shipped from this city yesterday to the placer mines of the Gold Nugget Placer Mining company in northern Elko county, Nevada. The equipment is being sent by way of Mountain Home, Idaho, as the haul from that point down to White Rock will be shorter and easier than by way of Elko, Nev.

BOARD SELECTED FOR NEW STOCK EXCHANGE

C. W. Hartley, the promoter of the new Utah Stock & Mining exchange, announced yesterday that David Keith will be president and that the other eight members of the governing board would consist of David Evans, B. F. Grant, George Thompson, J. R. Jones, R. L. Jones, J. C. Murdock and F. J. Westcott of Salt Lake; John P. Creer of Payson, and Joseph Berry of Provo.

The new exchange will operate as an association, on similar lines and under laws patterned after the old exchange, with a clearing house added.

Quarters are now being prepared in the Atlas block and the organization will be completed as soon as it is possible to occupy the room, which it is thought will be about the 20th of this month.

ORE AND BULLION

One and a half bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$115,000, as follows: Silver, lead, gold and copper ores, \$55,000; base bullion, \$60,000.

EASTER CUT FLOWERS.

We will, as usual, be away up in front with large supplies of cut Easter lilies, roses, carnations, etc. Send us your Easter order, and you can depend on getting it filled to your entire satisfaction. Come and see.

BIG OF THREE MINES

Colorado, Iron Blossom and Sioux Con. Will Pay Over \$204,000 This Month.

Yesterday was dividend day for Tintic stocks, and it was a good one. Colorado Mining ordered the payment of \$204,000, or \$80,000, on the 20th, books to close on the 15th. Iron Blossom posted its initial cash dividend, the amount in this instance being also \$204,000, or \$80,000, while Sioux Consolidated, which paid \$204,000, or \$80,000, on the 20th, raised the amount this month to \$204,000, or \$80,000.

With the current distribution the Colorado will have a record of having paid its shareholders a total of \$1,413,000. The total paid by the Sioux Consolidated, with this payment, approximately \$204,000, while the Iron Blossom, which last month came through with a 10 per cent stock dividend, start off, as stated, with a payment of \$204,000, or \$80,000, on its 900,000 shares of issued stock.

BRIGHT SPOTS IN THE MARKET

Week's Trading Has Shown How Easy It Is for the Market to Move.

There has been a good deal of uncertainty in the way the mining stock market has behaved during the past week, and at times there appeared to be danger of a general slump. Rallies, however, were usually as pronounced as were the declines, and taken on the whole the close finds things in better shape than at the beginning of the week. The sharp and pronounced advance of Columbus Consolidated in Mason Valley, Prince Consolidated and a few others, when it came to a show-down, showed how easy it is for stocks to move up and free themselves from any attempts at bear raids, while the jump in Uncle Sam Consolidated at the wind-up of the trading made it apparent that good news from the mines can be relied upon to start any stock moving.

The market situation, therefore, is far from discouraging, and if the tariff tinklers will hurry their work and go home there is some hope of doing all over the country in a stock market way.

During the week a total of 78,727 shares of stock, with a selling value of \$68,971.52, changed hands. Yesterday's contribution to the totals was \$4,710 shares of stock, the selling value of which was \$3,670.12.

GOLDFIELD EXCHANGE TO GET DIRECT NEWS TO EAST

According to the news from Goldfield, George Wingfield, who was recently elected president of the mining stock exchange there, is planning to make it a much more important institution than it has ever been before. During his trip east Mr. Wingfield contracted for the lease of a direct wire between the Gold-

The Sunnybrook Coal & Coke Company

Owning Over 800 Acres of Rich Coal Land in Carbon County, Offers to the Public

50,000 shares of treasury stock at 25 cents per share

The physical condition of the mines at this time warrants us in saying that this stock is NOW worth PAR. We mean by this that for every share of stock issued there is ONE DOLLAR'S worth of property back of it. When the added equipment is installed and the shipments begin for the winter, the stock WILL GO TO PAR. This alone will make you a net profit of 75 cents per share. With the payment of the first dividend, it will be much higher.

Our main tunnel on No. 1 vein is in 350 feet, and has opened up thousands of tons of coal, and we are now shipping to Salt Lake. This being the nearest mine to Salt Lake City gives us the advantage of a close market for all the coal we can produce.

Experts pronounce our coal of the highest quality, and consumers who have used it will use no other. Blacksmiths pronounce our slack superior to Pennsylvania blacksmith coal, for which they pay \$18.00 per ton. The company has no difficulty in disposing of its product—the difficulty lies in producing enough coal for the demand, which is not possible with the present equipment.

Shipments of only 250 tons daily is sufficient to pay dividends of 18 per cent on the issued stock. We want to maintain shipments of 1,000 daily. It is for the purpose of adding this necessary equipment that this stock is placed on the market at 25 CENTS PER SHARE. You can buy in any amount from 100 shares up; preferably not more than 1,000 shares to one person, as a large list of stockholders makes a large list of consumers.

This IS NOT a speculation, but an INVESTMENT. We advise IMMEDIATE purchase of this stock, for this offer will not stand very long, the allotment being small, it will be taken quickly.

The officers of the company are among the most successful and best known business men of the city. You can feel safe when associated with them in any business.

OFFICERS

W. S. McCORMICK, President. GEO. W. MORGAN, Vice-President. O. G. Snow, Secretary.
RODNEY T. BADGER, Treasurer. P. W. GORMAN, Director. J. G. POTTS, Director.

Call at the company's offices and see this coal and get full information regarding the property. A postal address to the company will bring you the information by mail.

320-321-322 D. F. WALKER BLDG. SALT LAKE CITY

The Safest and Most Profitable Investment in the West

It is as safe as a Farm and as Profitable as a Gold Mine. You can DOUBLE your money in six months if you wish to sell or possess one of the most permanent and profitable DIVIDEND-PAYING securities obtainable.

THE JUMBO PLASTER AND CEMENT COMPANY

Owning nearly 5,000 acres of gypsum land containing immense mountains of the Purest GYPSUM in the world. This statement is verified by America's foremost geologists and chemists. The deposits are located about nine miles northwest of Richfield, Utah.

A mill, modern in every respect, and having a capacity of 150 tons per day, has been in operation since the first of the year, and is producing the highest grade material known to the consumers. The mill is located on the R. G. W. railway, and cars can be loaded from the door of the warehouse, and one of the most magnificent water powers in the state is utilized for the propelling of the machinery.

The Jumbo Plaster is being used extensively in the local market and in Pacific coast cities, and the fact that it is rapidly replacing many other brands of plaster demonstrates the superiority of its quality.

The urgent and rapidly increasing demand for this product would warrant the doubling of the capacity, and this can be done by a merely nominal cost.

A similar institution, having a mill with less than half the capacity of that of the Jumbo, and gypsum of much less purity, has paid 35 per cent dividend, and its stock has advanced to 350 per cent of its par value.

WHAT
